

# WANTED DEAD

## Orange Hawkweed

Photos courtesy of WA State Noxious Weed Control Board

- A perennial and member of the sunflower family
- The plant contains a milky sap
- Each plant has 5 to 35 flower heads
- Can be found at elevations from 5,000 to 12,000 feet
- Grows up to 12 inches tall
- Fibrous root system
- The leaves remain on the ground

Alternatives to plant: Sedums, hen and chicks, portulaca grandiflora, alyssum, phlox, sulfur flower, and kinnikinnick
