

# WANTED DEAD

## Rush Skeletonweed

Photos courtesy of WA State  
Noxious Weed Control Board

- Native of Eurasia
- Generally prefers well-drained, light soils
- Primarily spreads by seed, however cultivation can assist in the spread of the root system
- Perennial
- Stems may reach heights of 4 feet
- Stems may superficially appear to be leafless
- Both stems and leaves have a milky latex sap
- The yellow flowers are 3/4 inch in diameter
